

Model Development Phase Template

Date	15 March 2024
Team ID	xxxxxx
Project Title	xxxxxx
Maximum Marks	5 Marks

Model Selection Report

In the model selection report for future deep learning and computer vision projects, various architectures, such as CNNs or RNNs, will be evaluated. Factors such as performance, complexity, and computational requirements will be considered to determine the most suitable model for the task at hand.

Model Selection Report:

Model	Description
Model 1	Brief description
Model 2	Brief description
